

■ AI FILMMAKING Quick Start Guide

Master Avatar-Based Content in 7 Days

This guide gives you the exact framework to launch your first AI avatar system and start earning passive income through content creation.

What You'll Learn in This Guide:

- ✓ How to create AI avatars that look and sound human
- ✓ The 3-step content system that drives consistent views
- ✓ How to monetize your avatar content (3 revenue streams)
- ✓ Tools & workflows to automate your entire process
- ✓ The exact timeline to your first \$100 in passive income

The Secret: Most people think AI filmmaking is complicated. It's not. You just need the right system and the right tools. This guide shows you both.

The 3-Step AI Filmmaking System

STEP 1: Create Your Avatar

Use AI tools (Synthesia, HeyGen, or D-ID) to create a digital avatar that delivers your content. Takes 30 minutes to set up.

STEP 2: Script & Generate Content

Write short scripts (3-5 min videos) on trending topics. AI tools generate the video automatically. 15 minutes per video.

STEP 3: Post & Monetize

Post on YouTube Shorts, TikTok, Instagram Reels. Drive traffic to your monetized links. Collect passive income 24/7.

Your 7-Day Launch Timeline

Day 1: Set up your avatar + pick 3 niche topics (30 min)

Day 2-3: Create your first 3 videos (1-2 hours total)

Day 4: Post videos + set up monetization (1 hour)

Day 5-6: Create 4 more videos + optimize bio (2-3 hours)

Day 7: Review metrics + plan Week 2 (30 min)

3 Ways to Make Money

1. YouTube Monetization

YouTube Partner Program pays \$0.25-\$4 per 1,000 views. 1,000 views/day = \$7.50-\$120/month passive.

2. Affiliate Marketing

Promote tools, courses, or products you use. Earn 10-50% commission per sale. Example: Promote video editing software, earn \$20-50 per customer.

3. Sell Your Own Course/Community

Create a \$5-50 course teaching your system. With 100 customers at \$20 each, that's \$2,000/month.

Essential Tools (All Free or Cheap)

Avatar Creation: Synthesia (free tier), HeyGen (free tier), D-ID

→ *Create talking avatars*

Video Editing: CapCut (free), DaVinci Resolve (free)

→ *Edit & polish videos*

Script Ideas: ChatGPT, Claude

→ *Generate trending topics*

Audio: ElevenLabs (free tier), Descript

→ *Professional voiceovers*

Posting: Later, Buffer, or native apps

→ *Schedule posts*

5 Mistakes to Avoid

- Making videos too long (keep them 3-5 minutes max)
- Not focusing on a niche (pick ONE topic to dominate)
- Uploading inconsistently (post 3-4x per week minimum)
- Ignoring comments (respond within 24 hours to boost algorithm)
- Not testing different topics (test 5 ideas, double down on winners)

Your Action Plan

You now have the framework. Here's exactly what to do next:

Step 1: Pick your niche

Choose ONE topic (crypto, AI, productivity, finance, etc.) to focus on for Month 1

Step 2: Set up your tools

Create accounts on Synthesia/HeyGen and install CapCut or DaVinci

Step 3: Create 3 test videos

Make your first 3 videos to see what works

Step 4: Upload and optimize

Post to YouTube Shorts, TikTok, Instagram Reels

Step 5: Track metrics

Monitor views, engagement, and clicks daily
