

AURUM FOUNDATION

AURUM

Compact Introduction

A clear, compact guide to understanding Aurum, the AI finance ecosystem, the products, the risk profile, and the partner path - before you decide to start.

Understand first. Start only when it makes sense.

This is not a promise of guaranteed income. It is a short decision map: what Aurum is, how the core products differ, where the risks are, and how to take the next step intelligently.

Why Aurum is getting attention

Most people do not want another complicated trading tool. They want a simple way to understand AI-powered finance, the risk profile, and the next step.

The shift is simple:

AI is moving from something you manually prompt into systems designed to work in the background. Aurum positions itself around AI trading products, education, community, and a partner structure.

The problem

- Manual trading takes time, emotion control, and skill.
- Many people are curious about crypto but do not know where to begin.
- Most opportunities are explained with hype instead of clarity.
- People need a way to learn before making a decision.

The Aurum angle

- A compact ecosystem instead of a single isolated tool.
- Two different AI trading approaches with different risk profiles.
- Official videos and documents for deeper due diligence.
- A partner model for people who can educate and build trust.

The real question is not: should everyone join?

The better question is: who is open-minded enough to understand it early, assess the risk, and then decide if it fits their situation?

The ecosystem in one page

Aurum gives different types of people different ways to participate - from conservative compounding to higher-risk, non-custodial AI trading.

CONSERVATIVE ENGINE

EX-AI Bot

- Non-leveraged spot trading model.
- Built around conservative compounding.
- Daily auto-compounding can reinvest profits automatically.
- No borrowed capital and no leverage-based liquidation risk.
- Best fit when someone can commit to a longer investment horizon.

FLEXIBLE AI AGENT

Neyro Quantum Alpha

- Non-custodial structure: funds remain in the user's smart contract.
- Uses leveraged derivatives, so risk and volatility are higher.
- Designed for flexibility: no lock-in and a 48-hour wind-down process.
- On-chain transparency allows activity to be verified.
- Best fit for people who accept higher risk for higher potential upside.

Important: The numbers above are based on supplied Aurum community/support materials. They are historical and educational only. They are not a guarantee of future performance.

The risk conversation builds trust

Strong opportunities do not become stronger by hiding risk. They become stronger when the right people understand what they are actually joining.

EX-AI: lower market-direction risk, but custodial and lock-in considerations

- No leverage and no borrowed capital.
- Spot model means no leverage-based liquidation.
- Aurum holds funds during the trading period.
- 12-month lock-in and early exit conditions should be understood before starting.

Neyro: higher return potential, higher volatility

- Leverage can amplify both gains and losses.
- Non-custodial structure is a major difference: funds remain in your smart contract.
- Market volatility can affect leveraged derivatives more sharply.
- Only use capital you are comfortable placing in a higher-risk environment.

A simple decision filter

If someone needs guaranteed income, cannot accept crypto risk, or needs the money back quickly, this may not be suitable. If someone is curious, patient, coachable, and willing to understand the system first, Aurum may be worth exploring.

If you are a marketer or team builder, there may also be a partner path: you can share this opportunity professionally, educate the right people, and potentially grow your income. Read the Partner Program Overview for details.

Who this is for - and who it is not for

This section filters the right people in and the wrong expectations out. No one should feel pressured to join.

This may fit you if...

- You are curious about AI, crypto, and future-facing finance.
- You want a system explained clearly before you decide.
- You prefer not to stare at charts or trade manually.
- You can think long term and respect risk.
- You enjoy sharing useful information with crypto-curious people.
- You are good at team building, follow-up, and helping others understand.

This is not for you if...

- You want guaranteed profits.
- You expect zero risk.
- You are not willing to learn the basics before starting.
- You need instant liquidity or cannot handle volatility.
- You only want hype and do not care about transparency.
- You are not comfortable with crypto-based products.

The best kind of participant is informed, not pressured.

That is why this PDF starts with education and resources. The goal is not to force a decision. The goal is to help the right person see whether this belongs in their financial future.

The partner opportunity in plain English

Aurum can be used personally, but it can also be shared professionally. The strongest partners are not hype sellers - they are educators and trust builders.

1. Introduce

- Share the overview with the right people.
- Let them watch official resources first.

2. Educate

- Explain the difference between EX-AI and Neyro.
- Make risk clear before expectations are formed.

3. Build

- Support people who want to start.
- Grow a serious, long-term team.

Neyro partner track - compact summary

- Partner Bonus can open from Voyager rank and is based on trading agent profitability in your network.
- Maximum Partner Bonus potential is described as up to 30%, depending on Legacy Percentage.
- Neyro Sharepool can open from Oracle rank and is described as up to 3.125% of global Neyro profits, distributed quarterly.
- Neyro Legacy Volume starts at 15% after 30 days and can reach 40% after 120+ days.

What to do next

The best next step is small: watch the short video, read only what matters to you, and start only when the logic is clear.

If this made sense, do not overthink the first step.

Open the 1:18 start video. Then create your Aurum account through the private access button. You can ask questions and learn before making any financial decision.

A simple message you can send with this PDF

I found an AI finance ecosystem called Aurum. I am not asking you to decide today - just watch the short start video and read this compact overview. If it makes sense, I can show you the next steps and answer your questions.

Before sharing, add your own Aurum referral link.

Click the Add Your Referral Link button below. When the ChatGPT assistant opens, paste your Aurum referral link into the chat box and press Enter / Send . It will generate a new PDF with your referral links included.

You can reuse the assistant as many times as needed. Each different referral link creates a new PDF for that link.
